

Illustrating SAP Business Accelerator Hub

Objective

After completing this lesson, you will be able to illustrate SAP Business Accelerator Hub.

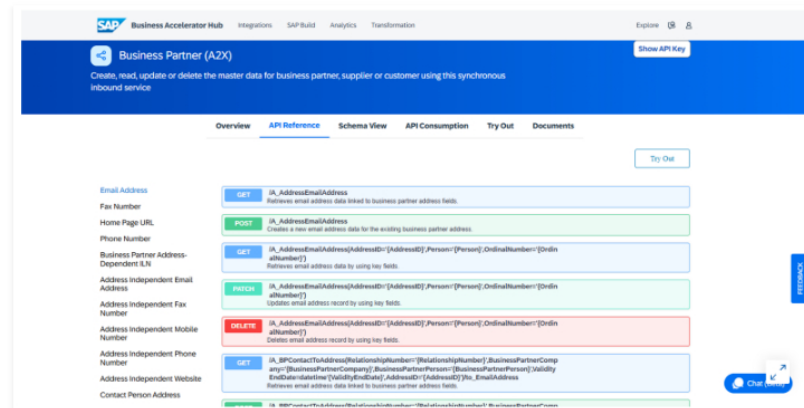

SAP Business Accelerator Hub

SAP Business Accelerator Hub offers you a wide range of sandbox APIs for several SAP products like SAP S/4HANA, SAP BTP, SAP SuccessFactors, SAP Concur, and more. You can use these sandbox APIs to create extensions, applications or integrations and test these with testing data provided through the sandbox API. All you need is the API key to authenticate your requests. You can get your API keys by logging in with a SAP ID account on SAP Business Accelerator Hub and choosing *Show API Key* on the specific API page.

You can access the SAP Business Accelerator Hub here: <https://api.sap.com/>

API Reference in the SAP Business Accelerator Hub

You can browse through several sandbox APIs from several SAP products – for example, the Business Partner API from SAP S/4HANA. You can get the reference and schema for the API. You can even try out the APIs directly. SAP Business Accelerator Hub is the place for developers and Integrators to discover, explore, and consume APIs.

Key Takeaways Of This Lesson

SAP Business Accelerator Hub is a web application that allows you to test and inform about different APIs of different products, for example SAP S/4HANA, SAP SuccessFactors or SAP BTP. There is also a sandbox API available often. For authentication you only need an API key which you can generate inside of SAP Business Accelerator Hub. These capabilities enables developers to discover, test and use different APIs.
